

GREEN GLOBE

Green Globe is the worldwide benchmarking and certification program which facilitates sustainable travel and tourism for consumers, companies and communities. It is based on Agenda 21 and principles for Sustainable Development endorsed by 182 governments at the United Nations Rio de Janeiro Earth Summit in 1992.

Green Globe provides an environmental management framework for organisations to achieve sustainability.

CLIMATE ACTION AUSTRALIA

Ecotourism Australia developed the Climate Action certification program to measure and rank the efforts of organisations to reduce their carbon emissions. The Adelaide Convention Centre was a pilot participant in the program and has been successful in achieving Climate Action Innovator level, defined as a business that has undertaken a set of adaption and emissions reduction actions and are auditing and measuring their carbon footprint.
